

# Audio and Visual Integration and Support

## OPTIMIZING YOUR VISUAL APPLICATIONS

Optimizing the Possibilities! Video Guidance's Integration and Support services will design, install and support your facilities and visual applications so your company can optimize the use of your investment.

Video Guidance's audio visual integration team is committed to making sure our customers get the most out of their visual communications investments. Our design and installation engineers focus on managing our customer's unique facilities and critical applications. Our integration projects have included application deployments in healthcare, education, government, legal, financial, manufacturing and more. From distance learning to telemedicine to collaboration, we have the experience and expertise to go beyond our client's application needs to exceed their expectations.

Working closely with customers, IT departments, manufacturers and facilities managers, Video Guidance will design, manage, install and support audio visual environments specific to your communication requirements. Video Guidance has partnered with industry-leading manufacturers representing state-of-the-art technologies and creative applications to meet your unique needs within your budget constraints. Our customized solutions make complex applications and technology easy to use and cost-effective, while fully supported with Video Guidance's ONE CALL Audio Visual Support program.

**Pre-sale involvement with customers** - Video Guidance views the design stage as the most important step of your visual communication system.

**Project management** - Begins with a hand-over meeting with your entire team.

**Installation , programming and testing** - Video Guidance provides turn-key installation to ensure that each system is installed properly.

**Training** - Video Guidance considers training a critical part of a successful implementation.

*Our mission is customer satisfaction. We achieve our goals by carefully listening to and consulting with you to completely understand your visual communications needs, budget and objectives.*

### WHY INTEGRATION SERVICES?

- Our guiding principles – Easy-to-use, reliable, and high-quality user experience.
