

vStream™

VIDEO GUIDANCE WEBCASTING SOLUTIONS

Video Guidance vStream™ provides your company with an effective and efficient means of reaching your target audience with a compelling multimedia-based message.

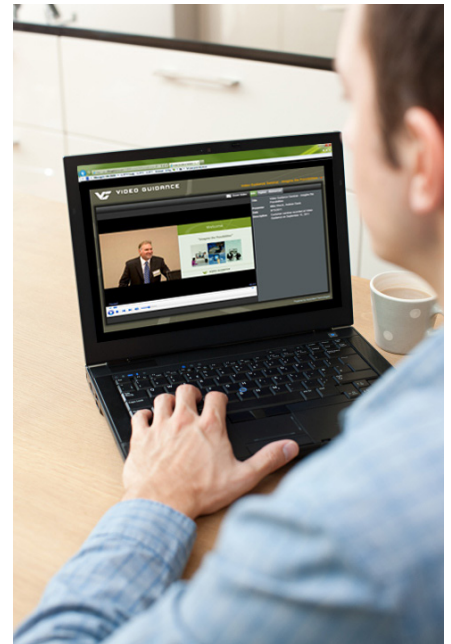

vStream™ streams video communications over the Internet. vStream offers your company an all-in-one, highly reliable live and/or on-demand solution increasing the visual impact of your sales presentations, product launches or business announcements. Best of all, video streaming with Video Guidance is secure, accessible and cost effective.

vStream integrates four essential elements of streaming video communications, including video capture, content management, portal services and rich media delivery. By integrating these important components into vStream, Video Guidance greatly simplifies what it takes to get your digital media applications up and running.

vStream can significantly reduce business costs and increase your productivity by allowing you to reach your audience anywhere at anytime. Let us help you maximize your event experience with the safest and most cost effective form of communication... a Video Guidance vStream.

vStream™ is an all-in-one, highly reliable solution that will dramatically enhance your collaborative capabilities with employees, partners, customers and sales prospects
